

DRIVING INNOVATION
EST. 1967

Cambridge

TEAM Industries' inaugural plant was opened in 1967 in Cambridge, MN. A small plant of only 1,000 sq ft now spans over 200,000 sq ft. TEAM Cambridge manufactures complex machined parts for the heavy duty truck, hydraulic, recreational vehicle, construction and agricultural industries. Our processing capabilities are broad and include machining a range of steel, aluminum and gray & ductile iron. As your manufacturer of choice, we are fully committed to ensuring flawless product launches, on-time delivery and pristine quality.

PLANT FACTS

- Certifications: ISO 9001:2015
- Employees: 130+
- Plant Area: ~200,000 sq ft
- Equipment: 100+ Machining Centers

MANUFACTURING PROCESSES

HORIZONTAL & VERTICAL MILLS

- Taper Spindles
- 400, 500 & 600mm Pallets
- Many equipped with Indexers
- Variety of Tool Magazine Capacities

HORIZONTAL & VERTICAL LATHES

- Single & Twin Spindle
- Nearly all 4 axis
- Programmable Tailstock
- Live Tool Options

SPLINE ROLLERS

- Up to 2" diameter and 48" in length

O.D. GRINDERS

- CNC Cylindrical Grinders
- Center-less Grinders
- Manual Cylindrical Grinders

ADDITIONAL IN-HOUSE RESOURCES AND CAPABILITIES

- In-House Metallurgical Lab
- Polishing and Cosmetic Expertise
- Honing, Tumbling, and Balancing
- Lapping
- Non-destructive Testing
- Leak and Cleanliness Testing
- Cellular approach with Robotics & Automation
- SPC Monitoring
- MAG Particle Inspection

MATERIALS PROCESSED

STEEL

- Carbon, Med Hardness Alloys, High Alloys
- Bar Stock, Castings, Forgings

ALUMINUM

- Bar Stock, Castings, Forgings
- Cast Iron
- Gray & Ductile Iron
